

Increased cabinet capacity

Composit design has allowed for more than 21%* extra space in base units and more than 10%** extra space in wall units.

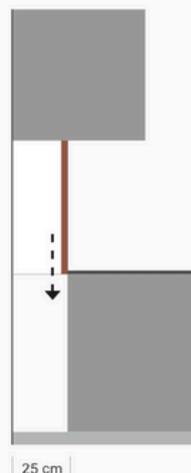

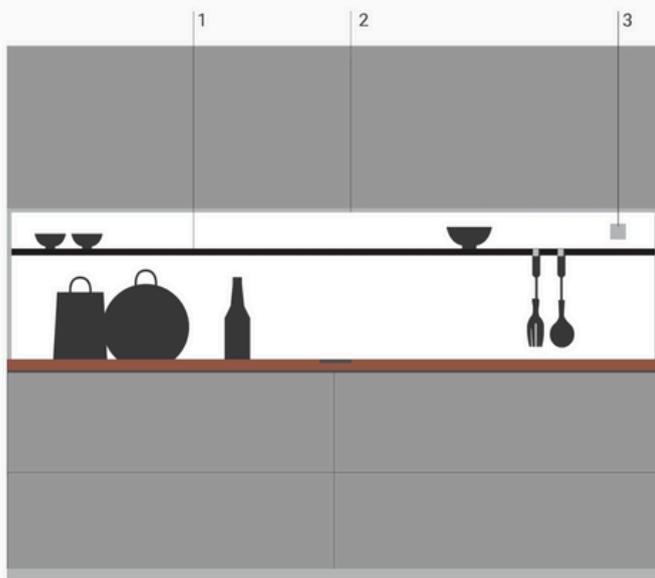

*compared to a standard cabinet that is 72 cm high and 59 cm deep

**compared to a standard cabinet that is 60 cm high and 34,4 cm deep

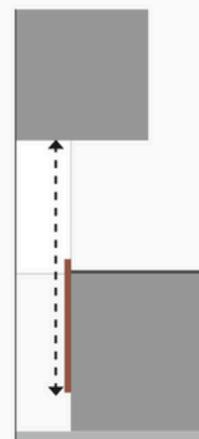

Composit sliding backsplash

Storage solutions

Through careful research and original, exclusive solutions, we offer the ability to customize our kitchens.

Pocket doors. A perfect mechanism allows the doors to be hidden within the sides of the columns, freeing up internal space for multiple solutions.

8mm back panel

The 8mm back panel provides the unit with greater stability and strength compared to a 3mm microfiber back panel.

Hidden wall brackets for wall units

Completely hidden behind the back panel, these brackets make the container look more aesthetically pleasing.

Burnished finishes for equipment and hinges

Hinges come as standard in a burnished finish; accessories are available in two versions: Basic (slate) and De Luxe (anthracite).

Drawer types

Blum Legrabox drawers and baskets made with full-extension sides equipped with a soft-close mechanism (available in white, grey, black, and stainless steel).
